Salesforce Trailhead Profile (Url : <https://www.salesforce.com/trailblazer/princessadmin>)

Salesforce Administrator (227+ Trailhead Badges | Double Star Ranger) with proven expertise in workflow automation, SOQL, user access control, and CRM data governance. Skilled in Salesforce Lightning, Process Builder, and Reports & Dashboards, with additional experience in IT asset management, IoT automation, AR/VR simulation, and CAD/CAE tools. Adept at cross-functional collaboration and delivering innovative digital solutions.

Professional Experience

Keysight Technologies International India Pvt. Ltd. – Global IT Services, Gurugram

Duration: Jan 2025 – July 2025

Role: IT Intern

- Automated Salesforce workflows, improving ticket resolution speed and CRM data quality.
- Developed SOQL queries for reporting and dashboards.
- Reduced redundancy by 30% through data governance improvements.
- Conducted regression/functional testing in Salesforce Lightning; reported bugs with detailed logs.
- Collaborated with CMD & KTAS AE teams for master data optimization.

Airports Authority of India (AAI) - IT Department

Duration: 16 Aug 2024 - 30 Sep 2024

Role: IT Intern

- Supported AIMS modules for air traffic control and flight scheduling.
- Assisted in data automation for import/export and reporting.
- Contributed to GeM (Government eMarketplace) initiatives for transparent procurement.
- Gained exposure to air traffic protocols and data privacy measures.

Automated Innovations Lab | Robolution Society

Duration: 05 June 2024 - 20 July 2024

Role: Intern

- Built smart home system with NodeMCU ESP8266 and Alexa/Google Assistant.
- Integrated Sinric Pro API for seamless device management.
- Designed relay control, Wi-Fi setup, and input stabilization.

Steamedu

Duration: 05 June 2023 - 18 July 2023

Role: Intern

Key Skills: Augmented Reality, Virtual Reality

- Developed VR environments using Unity and WebVR (A-Frame).
- Created cityscape & airplane crash training simulations.
- Optimized rendering for immersive experiences.

ANH - A New Hope

Duration: 13 June 2022 - 27 July 2022

Role: Intern

Key Skills: Creo, SolidWorks, Ansys

- Designed 3D models and assemblies in Creo & SolidWorks.
- Performed stress/deformation analysis in Ansys.
- Specialized in tolerance, material behavior, and design optimization.

Technical Skills

- **Salesforce:** Lightning, Reports & Dashboards, Workflow Rules, Process Builder, Data Loader, Validation Rules, CRM Implementation, User Role & Profile Management, Lead & Opportunity Management, Sandbox Testing
- **Programming & Automation:** Python, Arduino IDE, Sinric Pro API, Excel (Pivot Tables, Automation)
- **CAD/CAE:** Creo, SolidWorks, Ansys APDL
- **AR/VR Development:** Unity, A-Frame, WebVR
- **Other Skills:** IT Asset Management, CRM Data Governance, Problem-Solving, Collaboration & Teamwork, Agile Development

Education

● **Bachelor of Technology (B. Tech) in Mechanical and Automation Engineering**
Indira Gandhi Delhi Technical University for Women, Delhi, India

CGPA: 7.66 / 10 | Graduated: May 2025

● **12th Grade**

N.C. Jindal Public School, Delhi, India | CBSE | 87.6% | 2021

● **10th Grade**

N.C. Jindal Public School, Delhi, India | CBSE | 88.6% | 2019

Certifications & Credentials

- Salesforce Trailhead (227 Badges | Double Star Ranger)
- Lean Six Sigma & Quality Management
- Business Analysis & Process Improvement
- Excel for Data Management
- Digital Marketing & SEO

Core Competencies

- Testing & QA: Manual Testing, Regression Testing, Test Case Creation, Bug Reporting, Usability Testing, Cross-Browser & Cross-Device Testing
- Tools & Platforms: Selenium (Basic), JIRA, Postman (Basic), Salesforce, Data Loader, Unity, Arduino IDE
- Development & Automation: Python, Workflow Automation, Process Builder, Validation Rules
- Technical Design & Simulation: Creo, SolidWorks, Ansys, A-Frame, WebVR
- Other Skills: Agile Development, CRM Data Governance, Problem Solving, Collaboration, UI/UX Feedback

Achievements

- Research Paper Accepted at ICR CET 2025 for Scopus/WoS publication.

Technical Projects

Research Project – Hybrid Composite Materials

- Designed banana-carbon fiber–reinforced ZnO-Epoxy composites.
- Applied Chamis & Modified Halpin-Tsai models with FEA in ANSYS APDL.

Smart Home Automation Using Google Assistant & Alexa (NodeMCU ESP8266)

- Developed a smart home automation system using NodeMCU with Sinric Pro API.
- Enabled Wi-Fi-based control of appliances via mobile apps and voice commands.

Parachute Opening Simulation in Emergency Airplane Crash Landing (WebVR with A-Frame)

- Created immersive VR simulation for parachute deployment in emergency landings.
- Designed interactive 3D models using Unity & A-Frame.

Design and Simulation of structures(Creo, Ansys, SolidWorks)

- Modeled complex 3D structures in Creo & SolidWorks.
- Conducted stress and durability analysis using Ansys.
