PROFESSIONAL SUMMARY

Detail-oriented and multi-skilled B.Tech Mechanical and Automation Engineering graduate from IGDTUW, Delhi, with hands-on experience across software testing, Salesforce administration, CRM data governance, AI training-data style projects, technical documentation, automation, content systems, and digital portfolio development.

Experienced in manual QA testing, regression testing, bug reporting, Salesforce workflow automation, SOQL-based reporting, data cleaning, Excel-based analysis, GitHub-based project workflows, and AI-assisted content/documentation creation. Built multiple self-directed and freelance-style portfolio projects including AI image dataset preparation, bug-fixing research, trading-assistant bot workflows, NGO operations documentation systems, advocate documentation packs, freelancer toolkits, and creator content planning systems.

EXPERIENCE

Tester Work - Software Tester

Aug 2025 - Present | Remote / Platform-Based Testing

- Perform platform-based manual, exploratory, functional, regression, usability, localization, and user-flow testing across web and mobile experiences.
- Identify UI issues, functional errors, broken flows, form validation gaps, account creation issues, payment/user-flow problems, and device/browser inconsistencies.
- Write structured bug reports with reproduction steps, expected versus actual results, evidence, severity notes, environment details, and concise QA communication.
- Review user journeys from an end-user perspective, documenting friction points, confusing interactions, unclear copy, and cross-device behavior differences.

Independent Freelance & Portfolio Projects

Aug 2025 - Present | Remote / Self-Directed / Freelance-Style Work

AI Training Data & Image Collection Projects

- Built structured AI training-data style workflows for scene-object image collection, isolated object references, base scene images, and final scene integration examples.
- Applied quality principles such as object visibility, clear framing, natural lighting, clean backgrounds, angle consistency, and environment-object relevance.
- Organized file sets with metadata-style notes, image quality observations, environment type, object category, and scene descriptions.

Bug Fixing, GitHub PR & Bounty Platform Research

- Explored GitHub, Algora-style bounties, bug bounty boards, issue-based workflows, contributor instructions, labels, and pull request processes.
- Practiced bug identification, issue triaging, reproduction steps, requirement reading, technical note-taking, and security-aware review using VirusTotal.

Trading Assistant Bot & Market Automation Workflows

- Designed personal trading-assistant workflow logic around intraday scanning, breakout identification, ranked candidate cycles, risk-reward calculation, quantity sizing, and alert formatting.
- Worked with AI coding assistants on modules for strategy logic, reports, telemetry, storage, configuration, runtime windows, email notifications, and CLI workflows.

Documentation Toolkits

- Created client-ready documentation concepts for NGO operations, advocate legal-admin support, freelancer service operations, and creator content planning.
- Structured templates, checklists, tracking sheets, SOPs, communication formats, process maps, and platform-ready writing systems with responsible-use framing.

Keysight Technologies International India Pvt. Ltd. - IT Intern

Jan 2025 - July 2025 | Global IT Services, Gurugram

- Supported Salesforce and CRM workflows involving data imports/exports, reports, dashboards, workflow automation, CRM data quality, and master data optimization.
- Cleaned, validated, optimized, and prepared files before submission to support better CRM data governance and reduce data inconsistencies.
- Used Salesforce Lightning, SOQL queries, reporting, dashboards, Excel, and data handling workflows to review records and support data operations.
- Performed regression and functional testing in Salesforce Lightning and prepared detailed bug reports with reproduction context and expected/actual behavior.
- Collaborated with CMD and KTAS AE team members to support ticket handling, process review, and operational CRM tasks.

SOQL

Reports & Dashboards

Data Loader

CRM Data Governance

Functional Testing

Unessa Foundation - Crowdfunding & Fundraising Intern

Oct 2025 - Nov 2025 | Remote

- Supported crowdfunding campaign activities through outreach, donor communication, stakeholder engagement, campaign messaging, and nonprofit fundraising workflow coordination.
- Prepared communication drafts, campaign notes, and outreach-oriented content for potential donors and supporters.

Fundraising

Outreach

Donor Communication

NGO Operations

Airports Authority of India - IT Intern, Aviation Systems & Data Automation

Aug 2024 - Sept 2024 | Delhi

- Gained exposure to AIMS modules, aviation information workflows, data automation concepts, government IT systems, Government eMarketplace initiatives, aviation protocols, and data privacy considerations.
- Supported process documentation and system understanding around import/export, reporting, and operational data workflows.

IT Operations

Data Automation

AIMS Exposure

Process Documentation

IGDTUW / Robolution Society - IoT & Automation Intern

June 2024 - July 2024

- Built a smart home automation system using NodeMCU ESP8266, Arduino IDE, relay circuits, Wi-Fi setup, Sinric Pro API, Alexa, and Google Assistant integration.
- Worked on input signal stabilization, hardware-software integration, and end-to-end automation testing.

IoT

NodeMCU ESP8266

Arduino IDE

Sinric Pro API

STEAMEDU Learning Pvt. Ltd. - AR/VR Development Intern

June 2023 - July 2023

- Built VR environment concepts using Unity, WebVR, and A-Frame, including cityscape exploration and airplane emergency landing simulation workflows.
- Supported 3D rendering optimization, scene structure, interaction clarity, and simulation design.

Unity

A-Frame

WebVR

Simulation Design

ANH - A New Hope - Mechanical Design & Simulation Intern

June 2022 - July 2022

- Created 3D mechanical models using Creo and SolidWorks and performed structural stress, deformation, tolerance, and material behavior analysis using Ansys APDL.
- Applied CAD/CAE workflows to support mechanical design review, simulation interpretation, and design optimization.

Creo

SolidWorks

Ansys APDL

CAD/CAE

SELECTED PROJECTS

AI Scene & Object Image Dataset Project

Self-directed AI data project using base scenes, isolated object images, object-scene mapping, visual QA, metadata notes, and image quality review.

Personal Trading Assistant Bot

Personal automation workflow for intraday scanning, breakout filters, ranked candidates, risk-reward calculation, alert formatting, reports, and documentation.

NGO Operations Documentation System

Client-ready documentation concept covering governance, HR, volunteers, fundraising, grants, compliance, impact reporting, communications, and risk management.

Advocate Documentation Support Pack

Legal-admin organization system with case intake, client communication, hearing notes, checklists, matter trackers, follow-up logs, and responsible-use disclaimers.

Freelancer Operations Toolkit

Service operations pack for onboarding, pricing, proposals, delivery checklists, revision tracking, invoices, testimonials, portfolio planning, and lead research.

Creator Content Planning Toolkit

Content operations system for carousel ideas, captions, hooks, storytime scripts, blogs, content calendars, platform repurposing, and visual direction.

Smart Home Automation using NodeMCU

IoT automation prototype with NodeMCU ESP8266, relay circuits, Wi-Fi configuration, Sinric Pro API, Alexa, and Google Assistant.

VR Emergency Landing Simulation

AR/VR simulation concept using Unity, WebVR, and A-Frame for emergency airplane landing and parachute deployment visualization.

Hybrid Composite Materials Research

Academic/research-oriented work connecting mechanical analysis, material behavior, CAD/CAE thinking, and technical documentation.

SKILLS

QA & Testing

Manual Testing, Exploratory Testing, Regression Testing, Functional Testing, Usability Testing, Cross-Browser Testing, Cross-Device Testing, Bug Reporting, Test Case Writing, Screenshot Evidence, Screen Recording, UI/UX Feedback, Issue Reproduction, QA Documentation.

Salesforce & CRM

Salesforce Lightning, Reports & Dashboards, Workflow Rules, Process Builder, Data Loader, Validation Rules, SOQL, CRM Data Governance, User Roles & Profiles, Lead & Opportunity Management, Sandbox Testing, Data Import/Export, CRM Automation.

Programming, AI, Outreach & Documentation

Python, JavaScript, Java Basics, HTML, CSS, GitHub, GitHub Pages, CLI Basics, PowerShell, Replit, VS Code, Codex, ChatGPT, Claude, Gemini, Grok, Prompt Engineering, Dataset Structuring, Prospeo, Apollo, Reoon, LinkedIn Research, Google Sheets, MS Word, Google Docs, Excel, Notion, Canva, Behance, Medium.

Engineering & Simulation

Creo, SolidWorks, Ansys APDL, Unity, A-Frame, WebVR, Arduino IDE, NodeMCU ESP8266, Sinric Pro API.

EDUCATION

Indira Gandhi Delhi Technical University for Women, Delhi

B.Tech in Mechanical and Automation Engineering | 2021 - 2025 | CGPA: 7.66 / 10

N.C. Jindal Public School, Delhi

Class XII - CBSE - 87.6% | Class X - CBSE - 88.6%

CERTIFICATIONS & LEARNING
